

## Sprint 3 Plan

ArBit | Twelve Articles | Nov 3rd | 1.0 | Nov 1st

- **Goals:**

- Add collaboration functionality between members of the room. (Voting)

- **Task listing, organized by user story:**

- **User story :** *As a user, I want to be able to vote on each choice.*
  - Task 1: Multifunction("Done") button that allows users to submit their option and vote
  - Task 2: Complete UI for voting.
  - Task 3: User should be able to only vote one "n" for each option (# dropdown)
  - Task 4: Functionality to make sure users can't vote after all user votes are complete
  - Task 5: Allow user to finalize their voting
- **User story :** *As a user, I want to see the result of votes.*
  - Task 1: Retrieve each vote list for each user
  - Task 2: Iterate through users and sum up votes
  - Task 3: Display results of votes to users
- **User story :** *As a user, I want to be able to select a place of choice from Yelp or Google.*
  - Task 1: When user types in their option, yelp is searched for that option
  - Task 2: Use device's geolocation to provide relevant results
  - Task 3: Store the yelp url and option in firebase
- **Interfrastructures / Spikes:**
  - Task 1: More firebase
  - Task 2: Multifunction buttons

### Team roles:

Jason : Product Owner { Developer }  
Alan : Developer  
Veronika : Developer  
Yasin : Scrum Master { Developer }  
Mark : Developer
